3. HALF-SHARE (bi-weekly)= 10 weeks / \$350 (pick up at farm) /
DELIVERY HALF-SHARE = \$25
4. EGG SHARE: 20 weeks of free range hen eggs \$100, delivered with baskets

Hill Top Gardens is committed to bringing the highest quality organic vegetables to its CSA customers. We pledge to provide 3 weekly deliveries starting late May until mid-June and a full 20-week share from mid-June until the end of October. We will use all of our combined experience to mitigate any challenges presented by weather, insects, or plant disease.

Deliveries

Deliveries are \$50 for full season and \$25 for half shares. Subscribers must reside within 5 km of the main delivery route (link to map); however, a final decision will be made upon application. Members are responsible for leaving out a cooler with ice packs to receive the basket contents on delivery day. We will not be leaving our own coolers out this year.

Modifiable Baskets

An email will go out every Sunday to each member, listing basket contents for that week. Members can log in to their account to modify their baskets by Tuesday noon. Members may also purchase extra produce, depending on availability. Not all produce will be available all the time. If members do not wish to modify their basket, there is no action to be taken on their part.

Vacations

The regular season now extends later into the fall, so makeup weeks will not be an option this year. If you are on vacation, baskets may be given to a friend/neighbour/family, depending on their location. The share member must register a vacation at least 48 hours before taking the vacation.

Seasonal growing and eating

As a member, you commit to understanding the challenges of growing seasonal vegetables. If the forces of nature make certain crops less available, you will accept that with grace and understanding. We the farmers commit to working with a large variety of vegetables so as to minimize any potential effects of losing a crop or two. We commit to using our many years of experience, good techniques and equipment to provide you with the best quality of organic vegetables for the duration of the season.

Building a Sustainable Food System

Together we commit to contributing to a more healthy, safe and sustainable food system that is locally-oriented, and that inspires community interaction around food. We, the farmers, look forward to getting to know you and enjoying the season together.
